Profile

My skills include extensive knowledge of programming languages and practical experience. I have the ability to plan, design and build computational systems. Also, I am an effective team member and an excellent leader when it's required. For now, I am hoping to become a software developer. However, in the future, I expect to become a scrum master to head my own team. I am currently seeking a position in a development team, due to I have the theoretical and practical knowledge, as well as the experience to face the challenges in the Information Technology world.
